

Credit Repair

This is a product that is extremely in high demand. When cold calling or direct selling, always remember that 79% of the people you contact have credit issues and a need for our service. Our service would just not be making an enormous amount of sales; you will be changing lives in the process! Be confident when presenting this product, you have every reason to!

This process would be for customers who have a bad credit or low fico score because of negative marking on their credit history. The call center job is to recognize those customers who are eager to refinance or get a new loan however cannot do so because of their poor rating.

This programme is helping earn revenue even on those leads where we have to let go off an interested customer because of their credit score without any particular team neither allotted to this process nor getting database to dial on this process.

The call center just have to redirect the customer to the Credit restoration officer instead of any loan officer for a 12 months credit repair session which we guarantee that they would be able to a prime rate for any future loans.

With just few vital information of the customer, the center gets paid. Even if the customer disagree to the credit repair officer in the days to come, the center still gets paid for transferring the customer to the Credit repair officer.

The center would be paid on successful closings:
